

# Wave Deserted

senseable city lab

Fabien Girardin  
Mauro Martino  
Carlo Ratti

MIT provided the equipment to map the electromagnetic density of GSM telephone networks during the journey through this section of the Ionian Islands. This map shows an initial depiction of the coverage. The logs captured the identifiers of 58 different cell phone towers in the area.

## CellID

|            |              |
|------------|--------------|
| 1 ~ 3333   | 30 ~ 23392   |
