ALGAECULTURE FEEDING SYSTEM BY CARLO RATTI ASSOCIATI, ECOLOGICSTUDIO, + CESARE GRIFFA

APRIL 14, 2014 EARTHCRAFT LEAVE A COMMENT

As part of the ‘future food district project’, developed by [carlo ratti associati](#) at expo milano 2015, the façades and canopy proposed for the pavilion utilize new systems of micro-algae, designed by [cesare griffa](#) and [ecologicstudio](#). the two prototypes are full scale models and are on display at [interni’s](#) gala, ‘feeding new ideas for the city**’ in the courtyard of università degli studi di milano from april 7-18th. the concept constitutes a revolution in building technology and integrates both farming and urban agriculture.**
